

Crafting Skills

Alchemy

Governing Stat: MND

Description: The craft of distilling essences into potions, toxins, enhancers, and volatile reagents with precise chemical and magical responses.

Rank Benefits

Rank 1: Gain +Rank to Alchemy-related crafting rolls.

Rank 2: +R MP² +R Max MP

Rank 3: May include a secondary effect in any potion. Its strength is limited to (Rank ÷ 2, rounded down). Gain +Rank to the number of uses or charges when making multi-dose items.

Rank 4: May reduce crafting time of any alchemical item by (Rank × 10%).

Rank 5: On a critical success, both effects apply at full potency and the potion gains a bonus trait (e.g., longer duration, splash radius, delayed trigger).

Apothecary

Governing Stat: MND

Description: The creation of medicinal pastes, dry compounds, salves, incense, and balms using herbs, roots, and natural compounds for internal or external use.

Rank Benefits

Rank 1: Gain +Rank to Apothecary-related crafting rolls.

Rank 2: +R MP² +R Max MP

Rank 3: Poultices and salves gain +Rank to healing, duration, or condition removal potency. May stack up to Rank effects into a single preparation.

Rank 4: Gain +Rank to resistance against poisons or diseases for the duration of crafted medicines.

Rank 5: On a critical success, medicine gains a delayed effect or lingers for multiple applications.

Artificing

Governing Stat: MND + SPT

Description: The fusion of arcane knowledge and mechanical design to create magically empowered devices, affinity-linked components, and reactive constructs.

Rank Benefits

Rank 1: Gain +Rank to Artificing-related crafting rolls.

Rank 2: +R MP² +R Max MP

Rank 3: Artificed items gain +Rank bonus to activation timing or recharge rates. Constructs or infused tools gain +Rank to resistance vs magical interference.

Rank 4: May integrate up to Rank affinity types into a single item.

Rank 5: On a critical success, the device gains a passive magical intelligence or conditional response behavior.

Aether Weaving

Governing Stat: MND or SPT (use the lower)

Description: Weaving arcane filaments and magical cloth into force-reactive garments, veils, and channeling gear.

Rank Benefits

Rank 1: Gain +Rank to Aether Weaving-related crafting rolls.

Rank 2: +R MP² +R Max MP

Rank 3: May weave up to Rank passive magical effects into one item. Crafted garments provide +Rank × 5% base Magic Resistance.

Rank 4: Mana-based wearers reduce spell cost by (Rank × 5%) when wearing woven items.

Rank 5: On a critical success, the item becomes self-repairing or stores 1 spell effect for delayed release.

Beastcraft

Governing Stat: SPT

Description: The crafting of companion, mount, or beast gear—tack, signal tools, barding, and behavioral accessories.

Rank Benefits

Rank 1: Gain +Rank to Beastcraft-related crafting rolls.

Rank 2: +R SPT² +R SPR

Rank 3: Crafted gear provides +Rank to animal obedience checks when equipped. May include Rank minor enhancements (e.g., tracking scent, padded hooves).

Rank 4: Reduce gear weight by (Rank × 10%) when worn by mounts or pets.

Rank 5: On a critical success, item becomes bond-linked for danger sense, emotion sharing, or command relay.

Binding & Sealing

Governing Stat: MND

Description: The creation of magical seals, spiritual bonds, and containment runes to lock, store, or trap magical forces, creatures, or memories.

Rank Benefits

Rank 1: Gain +Rank to Binding-related crafting rolls.

Rank 2: +R Max MP² +R MPR

Rank 3: Seals gain +Rank to resist dispelling, tampering, or erosion. May bind +Rank different magical effects or entities into a single container.

Rank 4: May include delayed, conditional, or remote triggers in seals.

Rank 5: On a critical success, the seal becomes self-reinforcing or recursive, regenerating its power over time.

Biomancy Crafting

Governing Stat: MND

Description: The shaping, grafting, and hybridization of living materials—flesh, organs, bone, and blood—to create biological gear or symbiotic enhancements.

Rank Benefits

Rank 1: Gain +Rank to Biomancy-related crafting rolls.

Rank 2:

Rank 3: Living gear gains +Rank to regeneration, adaptability, or sensory range. May graft up to Rank foreign traits (e.g., claws, gills, photosynthesis) into a crafted item.

Rank 4: May include Rank temporary or conditional regenerative features.

Rank 5: On a critical success, the item evolves over time or bonds fully with the user.

Bookbinding

Governing Stat: MND

Description: Creation of codices, journals, and magical books that hold knowledge or react to rituals.

Rank Benefits

Rank 1: Gain +Rank to Bookbinding-related crafting rolls.

Rank 2:

Rank 3: Store +Rank × 2 pages of encoded or magic-resistant writing. Include up to Rank hidden or defensive features per tome.

Rank 4: Reduce casting time of rituals read from the tome by (Rank × 10%).

Rank 5: On a critical success, book becomes self-indexing, self-updating, or develops limited sentience.

Bonecraft

Governing Stat: BDY

Description: The shaping and strengthening of bones, horns, and cartilage into armor, weapons, charms,

or ritual tools.

Rank Benefits

Rank 1: Gain +Rank to Bonecraft-related crafting rolls.

Rank 2:

Rank 3: Weapons and armor gain +Rank DR when using pure bone components. Items gain +Rank to resistance vs decay, wear, or time-based degradation.

Rank 4: May merge up to Rank additional organic materials (e.g., sinew, chitin) into a single craft.

Rank 5: On a critical success, the item can channel primal energy, granting it a passive bonus (e.g., fear aura, bone-mending, necrotic charge).

Carpentry

Governing Stat: SPT

Description: The design and assembly of wooden objects, structures, bows, and modular gear using frame-based logic.

Rank Benefits

Rank 1: Gain +Rank to Carpentry-related crafting rolls.

Rank 2:

Rank 3: Crafted wooden items gain +Rank to HP or DR (choose one) when appropriate. Bows and wood-framed weapons gain +Rank attack precision or durability.

Rank 4: Traps or doors built using Carpentry may incorporate up to Rank mechanical or magical triggers.

Rank 5: On a critical success, the object becomes modular, self-aligning, or collapsible for easy transport.

Ceramics

Governing Stat: SPT

Description: Crafting clay-based items including pots, ritual jars, and vessels for containing materials or magic.

Rank Benefits

Rank 1: Gain +Rank to Ceramics-related crafting rolls.

Rank 2:

Rank 3: Add +Rank heat resistance to ceramic objects. Vessels crafted resist pressure, cracks, and fractures equal to +Rank durability.

Rank 4: May embed up to Rank containment glyphs or sealing runes in the item.

Rank 5: On a critical success, the container amplifies or suppresses magical interactions held within.

Clockworking

Governing Stat: MND or SPT

Description: Precision timing and mechanical gearwork used for automation, traps, or delay-based mechanisms.

Rank Benefits

Rank 1: Gain +Rank to Clockworking-related crafting rolls.

Rank 2:

Rank 3: Create delay timers or interval triggers with (Rank) adjustable phases. Automata or traps may perform Rank sequential movements or effects.

Rank 4: Repeating mechanisms retain full function for (Rank × 10) cycles.

Rank 5: On a critical success, the mechanism becomes time-sensitive, self-resetting, or stores charge between activations.

Cooking

Governing Stat: BDY

Description: Creating meals, preserves, rations, and stimulant dishes for recovery or resistance.

Rank Benefits

Rank 1: Gain +Rank to Cooking-related crafting rolls.

Rank 2:

Rank 3: Meals restore +Rank to SP or MP. Meals grant +Rank to a single buff (chosen during crafting).

Rank 4: Meals remove up to Rank mild conditions (e.g., poison, fatigue).

Rank 5: On a critical success, meals become condition-resistant or grant temporary immunity.

Crystallography

Governing Stat: MND

Description: The growth, shaping, and enchantment of crystals as energy storage or spell structures.

Rank Benefits

Rank 1: Gain +Rank to Crystallography-related crafting rolls.

Rank 2:

Rank 3: May bind up to (Rank × 2) MP into minor crystal charges. Tune Rank minor effects into a single crystal array.

Rank 4: Fuse up to Rank crystal cores into one casting matrix.

Rank 5: On a critical success, crystal gains enhanced charge capacity, regeneration, or detonation protocol.

Dowsing & Rune Channels

Governing Stat: SPT

Description: The detection, alignment, and manipulation of ley energy or elemental currents to craft tools, stabilizers, or ritual-enhancing conduits.

Rank Benefits

Rank 1: Gain +Rank to Dowsing-related crafting rolls.

Rank 2:

Rank 3: Devices gain +Rank to stability in high-energy or ritual zones. Gain +Rank to elemental channeling or orientation efficiency.

Rank 4: May link up to Rank ley threads or ritual components into one array.

Rank 5: On a critical success, device attunes permanently to a ley line or generates passive ambient energy.

Enchanting

Governing Stat: MND

Description: The process of embedding magical energy into items through runes, sigils, or symbolic logic to create persistent effects.

Rank Benefits

Rank 1: Gain +Rank to Enchanting-related crafting rolls.

Rank 2:

Rank 3: May assign up to Rank magical affinities to a single enchanted item. Enchant items with tier-1 spell effects or elemental triggers based on Rank.

Rank 4: Link effects to conditional triggers (e.g., on-hit, on-block) up to Rank times.

Rank 5: On a critical success, enchantments gain charge capacity or passive aura effects based on item type.

Engineering

Governing Stat: SPT

Description: The design and assembly of mechanical systems, devices, and constructs used in traps, doors, weapons, or infrastructure.

Rank Benefits

Rank 1: Gain +Rank to Engineering-related crafting rolls.

Rank 2:

Rank 3: Create multi-part mechanisms with up to Rank modular triggers. Repeating devices function for

(Rank × 2) cycles before reset.

Rank 4: Integrate one arcane energy source or spell-based trigger per Rank.

Rank 5: On a critical success, mechanisms gain independent movement or sustained logic functions.

Fletching

Governing Stat: BDY

Description: The creation and refinement of arrows, bolts, darts, and other ranged ammunition including magical or trick-shot types.

Rank Benefits

Rank 1: Gain +Rank to Fletching-related crafting rolls.

Rank 2:

Rank 3: Arrows crafted gain +Rank to flight accuracy or penetration. Add elemental effects with potency up to Rank × 2.

Rank 4: May socket or enchant up to Rank different ammo types.

Rank 5: On a critical success, ammo becomes tricked (multi-stage, returning, or splitting on impact).

Gardening

Governing Stat: SPT

Description: The cultivation and care of useful flora, including medicinal, magical, and culinary herbs.

Rank Benefits

Rank 1: Gain +Rank to Gardening-related crafting rolls.

Rank 2:

Rank 3: Grown plants yield +Rank × 10% more volume. Enhance grown herbs to last (Rank × 2) longer in stored form.

Rank 4: May crossbreed or graft plants to produce up to Rank hybrid effects.

Rank 5: On a critical success, grown herbs gain magical traits or persistent regenerative properties.

Gem Crafting

Governing Stat: SPT or MND

Description: The cutting, refining, and enchanting of gems and crystals for use in jewelry, socketed items, and energy-channeling foci.

Rank Benefits

Rank 1: Gain +Rank to Gem Crafting-related crafting rolls.

Rank 2:

Rank 3: Gain +Rank to socket strength and stability when embedding gems. Gems may store +Rank affinity charges or effects.

Rank 4: May combine up to Rank compatible gem types into a single facet or setting.

Rank 5: On a critical success, the gem develops a unique aura or amplifies adjacent enchantments.

Glassblowing

Governing Stat: MND

Description: The shaping and formation of glass into vessels, lenses, focus tools, or arcane-compatible containers.

Rank Benefits

Rank 1: Gain +Rank to Glassblowing-related crafting rolls.

Rank 2:

Rank 3: Lenses or shaped glass grant +Rank to clarity, focus, or optical precision. Vessels resist pressure, vibration, or thermal stress up to Rank thresholds.

Rank 4: Infused glass may interact with spells or vibrations based on Rank sensitivity.

Rank 5: On a critical success, glass becomes mana-resonant or illusion reactive.

Harmonics

Governing Stat: SPT

Description: The construction of items or chambers that react to sound, rhythm, or vibration, used in both music and traps.

Rank Benefits

Rank 1: Gain +Rank to Harmonics-related crafting rolls.

Rank 2:

Rank 3: Craft resonant components with +Rank to sound clarity or response. Items may be tuned to respond to up to Rank frequencies.

Rank 4: Traps or amplifiers gain radius or duration equal to Rank $\times$ 5 feet/seconds.

Rank 5: On a critical success, crafted items emit controllable sonic effects or key-locked resonance.

Inscription

Governing Stat: MND

Description: Writing magical scrolls, seals, or runes that store spells, rituals, or logic gates for spellcasting.

Rank Benefits

Rank 1: Gain +Rank to Inscription-related crafting rolls.

Rank 2:

Rank 3: Encode cantrips and rituals with complexity up to Ranks. Scrolls may store spells of tier-1 or below, limited to Rank in number.

Rank 4: Store time-delayed effects or multi-step scroll logic (up to Rank triggers).

Rank 5: On a critical success, scroll becomes self-activating or multi-charge.

Jewelrycraft

Governing Stat: SPT

Description: Crafting ornamental or functional accessories that often interface with enchantments or mana conduits.

Rank Benefits

Rank 1: Gain +Rank to Jewelrycraft-related crafting rolls.

Rank 2:

Rank 3: Items gain +Rank to resonance, detection, or precision (e.g., amulets). May create up to Rank socket slots in one item.

Rank 4: Items can channel spells of Rank $\times$ 1 tier or equivalent minor effects.

Rank 5: On a critical success, the item gains charge capacity or reflexive enchantment (e.g., blink, barrier, reveal).

Masonry

Governing Stat: BDY

Description: The construction and reinforcement of stone structures, traps, floors, or inscribed walls.

Rank Benefits

Rank 1: Gain +Rank to Masonry-related crafting rolls.

Rank 2:

Rank 3: Stonework gains +Rank to DR or spell resistance when sealed properly. May include up to Rank compartments, pivots, or trigger systems.

Rank 4: Carve conduit channels that carry arcane energy or runes across (Rank $\times$ 5) feet.

Rank 5: On a critical success, stone structure becomes resistant to magical erosion or collapse.

Meteorics

Governing Stat: BDY or MND

Description: Working with metal from fallen stars to forge high-resistance or cosmic-reactive equipment.

Rank Benefits

Rank 1: Gain +Rank to Meteorics-related crafting rolls.

Rank 2:

Rank 3: Infuse gear with +Rank to resistance against one elemental or magical type. May craft weapons or tools with skysteel or mythic alloys based on Rank capacity.

Rank 4: Items reduce ambient magical interference by $(\text{Rank} \times 5\%)$.

Rank 5: On a critical success, crafted gear becomes void-resistant, spell-reflective, or reacts to stellar cycles.

Musical Craft

Governing Stat: SPT

Description: The creation of musical instruments and sonically reactive tools used for performance, magic amplification, and resonance-based effects.

Rank Benefits

Rank 1: Gain +Rank to Musical Craft-related crafting rolls.

Rank 2:

Rank 3: Instruments crafted may embed up to Rank minor charms or resonance tags. Items produce melodic effects with intensity or duration equal to Rank.

Rank 4: May amplify a spell's range or DC by $(\text{Rank} \times 5\%)$ when cast through a crafted instrument.

Rank 5: On a critical success, the item may store or release a spell or effect linked to melody or rhythm.

Mycology

Governing Stat: SPT

Description: The cultivation and application of fungal organisms for tools, gear, healing, toxins, or symbiotic crafting.

Rank Benefits

Rank 1: Gain +Rank to Mycology-related crafting rolls.

Rank 2:

Rank 3: May combine up to Rank fungal traits into a hybrid species. Crafted items self-regenerate HP equal to Rank per day if still alive or viable.

Rank 4: Items may release spore effects (e.g., poison, sleep) with potency = Rank.

Rank 5: On a critical success, gear gains adaptive traits (e.g., armor that responds to threat, tools that self-replicate).

Painting

Governing Stat: SPT

Description: Artistic creation of paintings, murals, magical symbols, and image-based illusions.

Rank Benefits

Rank 1: Gain +Rank to Painting-related crafting rolls.

Rank 2:

Rank 3: Painted objects may hold up to Rank illusory glyphs or light effects. Images can project emotional resonance with strength = Rank.

Rank 4: Paintings respond to proximity, gaze, or intent within $(\text{Rank} \times 5 \text{ ft})$.

Rank 5: On a critical success, images become partially animate or contain magic triggers.

Perfuming

Governing Stat: SPT

Description: The distillation and blending of scents, pheromones, and olfactory-based effects for utility or manipulation.

Rank Benefits

Rank 1: Gain +Rank to Perfuming-related crafting rolls.

Rank 2:

Rank 3: Create scent-triggered effects with up to Rank intensity. Craft masking, allure, or aversion effects with a duration equal to $\text{Rank} \times 10$ minutes.

Rank 4: Blend multiple scents for layered mental/emotional manipulation.

Rank 5: On a critical success, the perfume gains trigger conditions based on emotion, thought, or environment.

Psionic Imprinting

Governing Stat: MND

Description: Crafting items that respond to thought, memory, or emotion—often dream-linked or used by psionic characters.

Rank Benefits

Rank 1: Gain +Rank to Psionic Imprinting-related crafting rolls.

Rank 2:

Rank 3: Items may transmit basic intent or emotional states up to Rank times per day. Crafted gear may store Rank memory fragments or signal pulses.

Rank 4: Create dream-linked items that activate with sleep, trance, or meditation.

Rank 5: On a critical success, the item supports telepathy, shared thoughts, or subconscious resonance.

Rune-smithing

Governing Stat: MND

Description: The carving and embedding of runes into gear to impart magical, elemental, or symbolic effects.

Rank Benefits

Rank 1: Gain +Rank to Runesmithing-related crafting rolls.

Rank 2:

Rank 3: Runes may hold Rank charges before requiring recharge or burnoff. Glyphs may apply Rank-tier spell effects or wards when activated.

Rank 4: May combine up to Rank runes in one item with compatible interactions.

Rank 5: On a critical success, runes become permanent or require specific dispelling.

Scribing

Governing Stat: MND

Description: The creation of magical diagrams, scrolls, and precision writings that store spell logic or enhance rituals.

Rank Benefits

Rank 1: Gain +Rank to Scribing-related crafting rolls.

Rank 2:

Rank 3: Ritual diagrams may store Rank spell Ranks for delayed release. Scrolls cast spells of up to Rank × 1 tier.

Rank 4: Drawn paths or glyphs may redirect or boost spells with Rank potency.

Rank 5: On a critical success, ritual plans reduce cast time or enhance radius, duration, or control.

Smithing

Governing Stat: BDY

Description: The shaping and tempering of metal into weapons, tools, armor, and alloys.

Rank Benefits

Rank 1: Gain +Rank to Smithing-related crafting rolls.

Rank 2:

Rank 3: Metal items gain +Rank to durability or heat resistance. May include Rank structural enhancements (e.g., piercing, balance).

Rank 4: Armor gains DR equal to Rank when forged with compatible materials.

Rank 5: On a critical success, gear integrates a second metal or form-reactive property.

Soulbinding

Governing Stat: MND or SPT

Description: Binding spirits, essences, or metaphysical traits into items to create synergy or sentient gear.

Rank Benefits

Rank 1: Gain +Rank to Soulbinding-related crafting rolls.

Rank 2:

Rank 3: Bound items transmit Rank passive traits or stats. Gear improves with use, gaining +Rank XP or resonance with its wielder.

Rank 4: Emotional memory strengthens bonuses by Rank when used in personal arcs.

Rank 5: On a critical success, item gains intelligence, personality, or bonded abilities.

Tailoring

Governing Stat: SPT

Description: Sewing, stitching, and assembling cloth-based armor, gear, and robes for both mundane and magical use.

Rank Benefits

Rank 1: Gain +Rank to Tailoring-related crafting rolls.

Rank 2:

Rank 3: Crafted items gain +Rank to flexibility, movement, or concealment. Modular components allow up to Rank reversible features or storage slots.

Rank 4: May embed threads with buffering effects (e.g., elemental resistances) up to Rank × 5%.

Rank 5: On a critical success, gear becomes climate-reactive or gains illusionary or visual effects.

Tanning

Governing Stat: BDY

Description: The preparation, treatment, and shaping of hides, pelts, and organic matter into usable leather and soft armor.

Rank Benefits

Rank 1: Gain +Rank to Tanning-related crafting rolls.

Rank 2:

Rank 3: Leather goods gain +Rank to flexibility or concealment. Hide armor gains +Rank to DR when using quality hides.

Rank 4: May imprint beast or terrain traits into leather for resistance or camouflage bonuses.

Rank 5: On a critical success, crafted leather becomes hybridized with magical or bestial effects.

Tattooing

Governing Stat: SPT

Description: Etching magical tattoos, tribal marks, and enchanted sigils into flesh to imbue physical or mystical traits.

Rank Benefits

Rank 1: Gain +Rank to Tattooing-related crafting rolls.

Rank 2:

Rank 3: Tattoos grant passive traits with strength up to Rank. May grant +Rank to a stat or sensory trait through tattooed channels.

Rank 4: Craft conditional triggers (e.g., shield on hit, glow in darkness) up to Rank uses.

Rank 5: On a critical success, tattoo activates on command with combat-ready or reactive effect.

Tinkering

Governing Stat: SPT

Description: Building curious gadgets, compact tools, and inventive utilities from mismatched parts or refined materials.

Rank Benefits

Rank 1: Gain +Rank to Tinkering-related crafting rolls.

Rank 2:

Rank 3: May combine up to Rank materials into single-use or mechanical interactions. Pocket devices grant +Rank to a single use action (e.g., climbing grip, light burst).

Rank 4: Include one minor energy, sound, or motion reaction per Rank in a device.

Rank 5: On a critical success, devices become modular or adaptive to changing needs.

Umbrawork

Governing Stat: SPT + MND

Description: Crafting with shadow-aligned or void-infused materials to create cloaking items, teleport tools, and darkness-attuned artifacts.

Rank Benefits

Rank 1: Gain +Rank to Umbrawork-related crafting rolls.

Rank 2:

Rank 3: Crafted items gain +Rank to concealment, silence, or anti-light resistance. Items gain +Rank to interaction with illusions, darkness, or void zones.

Rank 4: May imprint up to Rank shadow effects or blink triggers in a single item.

Rank 5: On a critical success, the item can partially phase, vanish, or bend reality briefly.

Weaving

Governing Stat: SPT

Description: The knotting, patterning, and enchantment of woven fibers, cords, or textiles for banners, nets, or ritual gear.

Rank Benefits

Rank 1: Gain +Rank to Weaving-related crafting rolls.

Rank 2:

Rank 3: Threads can hold layered symbols with Rank effectiveness. May conceal up to Rank glyphs or effects in visual patterns.

Rank 4: Create netted traps or triggers based on Rank-linked activation (e.g., pressure, proximity).

Rank 5: On a critical success, weave grants protective wards or continuous sigil effects.
